Subject: sonic bliss

James,

Hi James, just received the B100 and it is every bit as good as I remember. I've heard a few integrated amplifiers during the past year but this one stands head and shoulders above the rest. Its bass reproduction is second to none as is the ease with which it gets out of the way and simply lets music pass through. I love this amplifier!!!

I want to extend my thanks [to yourself](#) and [my](#) congratulations to the entire Bryston team for building such remarkable and sonically superior products.

Kindest regards,

Philip
