Hi Edna,

Please see attached or order for Bryston B100 SST DAC.

Just so you know, this client has listened to the Sim Audio Moon here at our store, he auditioned the i-3 the i-5.3, i-7 , Primare I30 and I21. Obviously the B 100 is an amazing product from Bryston and possibly one of the best integrated amps ever constructed in this price range. (And above! The i-7 Retails for \$5300.00)

The B-100 proves itself every time it's played here at the store, and even on the most demanding of speakers. I thought you should know at Bryston how good of a job you guys were doing and give you some much-deserved compliments.

Thank you for your service.
