Subject: The B60 Integrated Amplifier

Hi, James,

I had to live with it for a couple of weeks to be sure I could trust my ears, but I'm now compelled to compliment you and your colleagues for a product that far exceeds my expectations.

BRYSTON B-60 Integrated Amplifier

I won't bore you with empurpled adjectives. This is just to say that after more than 40 years of breathing solder fumes and searching for the unachievable (with a number of Bryston products along the way), this is as close to sonic bliss as I have ever come.

My wife's spontaneous comment (her ears are impeccable) on hearing the amp for the first time (from the next room): **"What a sweet sound"**.

And the kids think the motorized volume control is way cool.

Thanks also for helping to make the experience affordable.

All the best,
Eitan
