

MEMO - Bryston Dealer Feedback

SUBJECT – Bryston/Thiel CES 2008 DEMO

Hi All,

Please see below some more feedback from one of our California dealers on our Demo at this year's CES Show. System was Bryston BP26/MPS-2, BCD-1 CD Player, Thiel CS 3.7's, Torus Power Isolation units.

“Hi JT,

After listening to numerous high dollar systems at the Vegas CES Show this year, I am compelled to let you know how your room “stacked up” to these other systems.

Overall, your Bryston/Thiel system punched my buttons in terms of very high musical purity, wide dynamic range, harmonic richness & dimensionality. There was not a hint of strain, dynamic compression, nor solid state/CD artifacts that can tend to produce an analytical edge to the music. Please note, I am comparing your system with other systems that sell for 2 to 5 times more.

In summary, I must say that your system was in the top group of systems that would make hard core analog/tube inmates shake their heads in disbelief. A winning combination, indeed. Keep up the great work!

**Regards,
Dan”**
