SUBJECT: Hi-Fi Choice Review on BCD-1 CD Player

October 2007,

Hi All,

Just got a PDF of the review on the Bryston BCD-1 CD Player in the December issue of Hi-Fi Choice in England.

It is a full 4 page review and to say it is a great review is a real understatement.

Bryston BCD-1

Here is the last paragraph in the review:

"If it's not already apparent by now, this is a **great CD Player**. We judged it by standards that are 50 percent more expensive and found little wanting in terms of musical engagement. In fact if timing is your bag then you might prefer the nailed down approach of the Bryston to competitors at twice the price.
